The **City & Guilds Teachers' Club** will take our academic support team on a Seminar Tour of 14 towns from 17 September to 10 October. You are cordially invited to attend.

DAY PROGRAM

10.00 – 11.00 **City & Guilds IESOL: Dealing with the Reading Section**

This presentation focuses on the reading skills and strategies tested in the City & Guilds IESOL examinations. The task types used in the exams will be analysed, the candidates' performance (including problems and difficulties) will be discussed and suggestions will be made for helping learners develop the skills necessary so that they can adapt their reading approach to the different types of texts and tasks they may come across in the IESOL examination. Finally, exam preparation and exam management tips will be given to help the learners develop their test taking strategies with regard to the reading paper.

11.00 – 11.30 **Coffee Break**

11.30 – 13.00 **Using communication tasks to enhance speaking performance**

Using communication tasks in the classroom requires careful selection of material that will not only match the students' level and interests but also help them develop their speaking ability in terms of fluency, accuracy and complexity. To ensure learners do not just 'practise' speaking but actually learn how to speak better, teachers will also need to help the learners prepare for the tasks in terms of language and content and they will need to provide appropriate feedback on language and task performance.

In this workshop, participants will learn how to select communication tasks for different levels and types of students and how to use the tasks to enhance learners' speaking performance so that they can become successful communicators and, incidentally, pass their exams.
