How to Give Feedback and Help your Learners Write Better

Research suggests that the most important factor contributing to writing skills development in a foreign language is the amount and quality of feedback students receive on the texts they attempt to write. In this workshop we will explore different ways of giving feedback on writing, focusing both on level of performance and on the process of producing written texts. Participants will get a correction and feedback kit that can be used for different genres of writing at different levels to give students a clear idea of where they stand and how they can improve.
